## Fish Sleep More Shrewdly Than Most People Suppose

The sleeping habits of fishes have been studied by an Australian fancler, and he concludes that a fish sleeps more shrewdly than we do.

"We go to bed," the expert declared, "close our eyes and snore. Once asleep we are beset by dangers-fire, burglars, murderers. A fish sleeps with his eyes open! He is born without eyelids, except in rare instances."

Apparently the eyes of a fish function even when the fish is asleep, for it has been observed that it is practically impossible to "catch a fish napping." If a person tries ever so carefully to poke one with a stick, he says, the fish is immediately galvanized into action, the eyes having sent the alarm to the sleeping body.

Unless rudely interrupted in his slumbers, however, the fish appears dead to the world, so still is its' body when it is resting. The breathing decreases until the body shows practically no motion and this leads persons observing sleeping fishes in aquariums to believe that they are dead.

Fishes sleep much more in the winter time than in the summer, often "hibernating" without food for days at a time. During these periods they draw on their body fats for sustenance.

## Arizona Meteor Theories Fail to Solve Mystery

Scientists have advanced two additional theories regarding the meteor which is believed to have struck the earth causing the great meteor crater in Arlzona. One of the theories advanced is that the socalled Arizona meteor was actually a real comet which collided with the earth.

The other is that this comet struck the earth at an estimated speed of 40 miles a second during safely kept beneath that but- the Thirteenth century and annihilated all the aboriginal clift dwell-

ce happy he when some fond teor crater as one of the three MARKET ew molat with love unspeak- known places in the world where a great meteor struck the ground. gged to her breast her babe But so far no scientist or scientific whose paradise meteor in the ground. Of the other two known meteors, one is in Siberla and the other in the Sahara in North Africa. The one that fell In Siberia is known to have knocked down by the force of its wind, all the trees in forests for many miles around.

Scientists believe meteors to be fragments of suns or other worlds. -Pathfinder.

## Scrambled Aphorisms

At a lecture before the Rotary club of Colombo, Rotarian Curry, of the Dorking club, mentioned that most of the native servants have a fairly sound working knowledge of English, but they are unable to comprehend the finer points of English idiom. A native, excusing himself for not attending to his work just went ahead and bought because his mother had died, wrote: "The hand that rocked the cradle has kicked the bucket." Another, in the course of an argument, said: "You have buttered your bread on both sides, and you must lie on it." Another plended that he was "so poor that he could not keep the cat out of the bag."-Ceylon Daily

## Yucca Wood

In the Southwest, especially in southern California, the yucca attains real tree dimensions, although the various species of yucca are not considered as trees. According to "Lumber and its Uses," nearly 200,000 feet of lumber is annually manufactured from yucca. The wood in very light in weight, fibrous, tough, and when wet, pliable and ensity molded into desired forms. It is used largely for woodenware and novelties, but a considerable quantity is used in millwork in Callfornie, and in that state it is used more than any other material in making artificial limbs, lackets, surgenus' splints and corsets.

## PAPER YOU TO READ

The result of a recent campaign to determine the more popular features of the Citizen has led us to adopt the present form of the paper and to present, in addition to the usual amount of local news, these popular features:

State News:

Here and There in Maine Doings of Legislature: Goings On in Maine

Questions:

How Much Do You Know?

Poems-Old and New:

With the Poets

Fiction:

The May Day Mystery Short Stories

Two-Minute Sermon

These features are instructive, en tertaining, and reliable, and are not to be found in any other Oxford County paper. The County news is sent direct to the Citizen each week by our own staff of correspondents, and many of our readers regard the paper as a history of this section, up to the minute each week.

The popular serial, "The May Day Mystery," by Octavus Roy Cohen, started last week. It will continue for three months. Send us fifty cents and we will send the Citizen to your address until the story is completed or buy it from one of the Citizen newsboys Their names are on page four.

ORDER YOUR CITIZEN TODAY -- READ HOME NEWS IN YOUR HOME PAPER

### American Trade Dollars Were Meant for the Orient

The trade dollar is a silver coin Lint was brought into existence in 1873 for export to China and other ariental countries to compete with the Spanish or Mexican dollars in circulation there. It was really a sievice for promoting the exportation of American silver. Silver in whis form was readily accepted because of the government guarantee of its weight and fineness. These colns were issued from 1873 to 1885, Inclusive.

Trade dollars also entered very largely into the trade of the Pacific const states and territories, and later circulated extensively in every other state and territory. They were not intended by congress to be legal tender, but through an error, the authorization act made them legal tender for sums up to \$5. The legal tender quality, however, was withdrawn by a joint resolution of congress approved July 22, 1870, and the colnage of trade dollars was limited to such numbers as the Treasury department deemed sufficient, for the export demand. They were finally retired under an act approved February 19, 1887.

Trade dollars of 1883, 1884 and 1885 are more rare than those coined during the other years, and if in good condition command premlum.

## Pluto, Ninth Major Planet,

Billions of Miles Away

Pluto is the ulnth major planet of the solar system, of the fourteenth and fifteenth magnitude, The existence of this body had been predicted in 1915 by the inte Prof. Percival Lowell. Lowells' calculations were based on the erratic behavior of Neptune, which was then the farthest known planet; the discovery was made in March, 1930. years of study would be needed to determine the facts. Skeptles in scientific circles suggested that the bates variety departing team Bennett spent Sunday body was a comet, or that its disshould be regarded as accidental. It is stated that the orbit of Pluto is from 2,800,000,000 to 4,000,000,-000 miles from the earth, from the orbit of which it is inclined 17 degrees. Calculated to be smaller than the earth, Pluto is invisible to most telescopes because it is not self-luminous and, boing perhaps the most distant object in the solar system, receives very little light from the sun.

## Araonic Enters

In the from mountain regions of the Austrian province of Styria, rar, Stewart Lane, Stanley Brown, day, swhere arrente is a by-product of iron smelting, some pensants ent this virulent poison, according to the National Geographic Magazine. It is taken in small doses, which are gradually increased as the system becomes used to it, until it may be taken dally, without visible iii effect, in quantity sufficient to kill an average person. The arrente is supposed to clear the complexion, increase the appetite, and improve breathing, especially for mountain climbers.

## Green and Black Tea

The most common tea in use is China tea, which is made from the leaves of Then Sinensis. This plant is closely related to the camellia. Both green and black ten may be manufactured from the same plant since the difference is due to the process of preparing the leaves. dreen ten is the result of drying the leaves tumediately upon their removal from the plant, while the feares of black ten are fermented for a short time before they are

Curvature of the Earth The curvature of the earth is about eight inches to the mile and varios as the square of the distance. For two follos the curvature is four times eight inches; for half a mile it is one fourth of eight inches, and so on. The curvature of the earth, making allowances for refraction, is about 229.5 feet for 20 miles. A ship 200 feet bigh is completely out of aight at a distance of 20 miles assuming the eye to be near the lovel

## They'll Take Care of the White House

Mr. and Mrs. Henry Nesbitt neighbors of the Roosevelts in Hyde Park, N. Y., who accepted Mrs. Franklin D. Roosevelt's offer to be custodian-chief clerk and housekeeper, respectively, of the White House. Mrs. Neshitt was once the manager of a co-operative market in Springfield, Mass, Mr. Nesbitt was formerly chief clerk for the Northern Pacific railroad in Affinesota,

## GOULD ACADEMY NOTES

Rebecca Carter, Gould '29, now member of the senior class at Bates College has recently been elected to Delta Sigma Rho nationby Clyde W. Tombaugh, assistant al honorary forensic society. Miss at the Lowell observatory at Flag- Carter will be remembered as one staff, Ark. The event created a of the best debaters ever to represensation, and it was reported that sent Gould on the forensic platform. She has been a member of near the predicted position work, having made the squad in her freshman year, Delta Sigma Rho national honorary society has but one chapter in Maine and that is at Bates College.

School on Friday will consist of one session beginning at 8:00 a. m. and ending at 12:10, thus affording the convenience of the afternoon for those going home for the vaca-

Declamations were given last week by Helena Vetquosky, Rosaline Rowe, Charles Dwyer, Phyllis Davis, Marjoric Berry, Mildred Far-Jeanette Sanborn, Kathryn Goldthwalt, Marguerite Hall, and Ruby Jodrey.

The basketball squad Journeyed! to Rumford Saturday where they had team and individual pictures taken. They were accompanied on the trip by Coach Anderson and Mr. Crane.

Dr. Hanscom devoted part of the chapel period Monday morning to discussion of questions pertaining to parliamentary law.

The five leading scorers on the Gould championship basketball team are: Paul Browne with 188 points, Morris Vall with 133, Stuart Lane with 98, Stanley Allen with 03, and Cyril McNally with 84,

Practice in baseball, under the direction of Coach Anderson, and in track, under the direction of Coach Fossett, will start directly after the Easter vacation.

And so he sneered at Max before boylah; his eyes the blue of a spring tatraight at you." the girl with whom Max fancled

himself in love. He taunted him Every person in college was Larry's peyer had that one pulled before." friend, or wanted to be. The freshmen who took English from him talk seriously." this year adored him. Frankly, he considered himself a rather ocor

teacher and was delighted that his freshmen liked him so well that they studied reasonably bard and did not confront him with the horror of flunking anyone. There wasn't a boy or girl of them who wouldn't - and didn't - work his head off for 'Fessor Welch.

But Commencement marked the end. Today that idea struck Larry more forcibly than ever before. While the weather was bleak and damp, Commencement had seemed far away; now that summer had burst suddenly upon the campus, It seemed that the end was upon him. He almost regretted his refusal of an offer from the president that would enery with it the position of assistant football concis and associate professor. Yet he knew that he dared not let sentiment sway him.

He was twenty-three years of age. In the city of Birmingham a good job awaited him; a job offering him enough salary to live well, save a trifle-and plan for the future; the last being something which Larry most ardently desired

The future . . the prospect was delightfully linked with visions of a home and a girl . . . a girl silm and straight and vivilt, bru-

for three marveious years and who was the envy of Marland if for no other reason than that she had won the affection of the great Larry Welch.

And even as Larry thought of her, the door opened and Tony Pey-"You've taken everything I had ton entered the room abruptly.

## Carried Too Far

The foreman was called away for a few days, and during his absence he left two of his most trusted workmen in charge.

"Pat," he had said before he went, "you can be foreman on Monday, and you. Mike, can be foreman on Tuesday." On Monday morning Foreman

I'nt made Mike's life unbearable. He gave him all sorts of difficult jobs, and complained because they were not done properly.' Mike stuck it out for as long as

he could without saying a word, At last he pulled Pat aside. "You're having it all your own

way today," he said grimly, "but waft until tomorrow, you'll wish you'd never been born,"

"You'll be doin' nothing to me, Mike, my lad," he said. "I'm foreman of this job today, and I'm givin' you the suck tonight,"-An-

## The May Day

By Octavus Roy Cohen One of the best of

the stories by this famous author

Murder is done on the quiet campus of a large Southern University. Around three persons-two students, one the most popular girl in the college, and a professor - is woven a web of circumstantial evidence and incriminating motives.

A second crime-apparently unconnected with the murder-is committed and to solve this is called Detective Jim Hanvey, a figure well known to Mr. Cohen's readers and who here makes his first appearance in a story of serial length. As the clues become more numerous and the trail more involved, the sleuthing methods of Detective Hanvey are followed with increasing rest until the reader fairly races ahead in an effort to check up on his deductions. It's the mark of a winner when a detective story moves along with the growing tenseness and excitement of The May Day Mystery. Ingenious, swift and

unusual, it is a yarn to

thrill the most jaded mys-

## HERE AND THERE IN MAINE

The appointment of Robert Braun of Portland as conservator of the Fidelity Trust Company and Harry M. Verrill conservator of the Casco Mercantile Trust Company was announced Sunday. The appointments were made by Chief Justice William R. Pattangall, under authority of the emergency banking law passed by the legislature on Friday.

Henry Cyr, the five year old son of Mr. and Mrs. Henry W. Cyr of Fairfield, was drowned Monday afternoon when he broke through the ice near the shore of the Kennebec river where he was playing. His sister was with him at the time the first time before a large g and she called her mother, but when other help arrived the body the Alumnae Building recently had been taken in the swift current.

According to figures gathered by Representative Utterback of ryn A. Herrick, a local girl, Bangor, 73% of the cultivated land member. in Maine is used for potatoes. This is the highest percentage of any State. The average production in and Beulah E. Bennett, '35, Maine is 293 bushels per acre, several songs at the tenth and while the national average is 109 bushels. Minnesota, which ranks men's division of Colby Col next to Maine, raised 25,500,000; held recently at Foss Hall. bushels on 329,000 acres, and Maine produced 47,500,000 bushels from of gain social events sponsore 63.000 acres.
